

CMP LAB 7

Task 1: Create above given binary tree from scratch, and follow the given tasks.

- Take node data from user as input
- For leaf nodes have left - right child inputs as -1.
- Print the binary tree in levelorder.

11

13 15

19 26 17 23

21 22 25

Task 2: Convert the above binary tree to Linked List (Flatten Binary Tree).

[Constraint : extra space $O(1)$ / constant.]
